Made from 304 medical grade stainless steel micron filter cloth, our filters provide consistent filtration paper filters can't touch. Even with this superior filtration our filter flows 7 times more oil in most applications, so it avoids dirty oil passing through your bypass valve during cold start ups. Stainless steel will stand up to the stress of heat, high pressure and moisture much better. The spin on models feature billet aluminum housings that not only look trick but aid in dissipating heat. Best of all you re-use it after cleaning!
